The project link on GitHub: <https://github.com/OTCv8/otclientv8>

After downloading wherever you prefer, you have to install the otclientv8.apk on your mobile.

- Note: Is just a guess but, the actual and available version for mobile is only compatible with android version 8 or plus.
- Note 2: This client already includes bot.

Then you have already installed, start the app and put all the information needed. If that was your first time, use the account manager for creating an account.

As you can see in the pictures below, it is very simple to access the game.

- Inform the account name and password.
- Inform the ip server: karibo.sytes.net
- Inform the protocol game: 8.6
- Click on login, select your character and customize your client as you want.
- Have fun.
